Regarding SHS and QA/QC, I think Russ is investigating my suggestion of the contract clinical trials company as per my prior note. I think he will be trying to set up a call with them and Judy Baldwin so they have a sense of the scope of work. Perhaps you could calibrate with Russ to determine the next best time for the TC to meet (call)

Thanks, Stu, I thought this was the case, but wanted to confirm without digging through lots of emails.

I guess I need to get another SHS TC call together for QA/QC reasons.

Thanks,
Jennifer Galvin

Jennifer:

The newly formed Benzene Product Stewardship Coalition met with TCEQ last year with perspectives regarding benzene and will likely comment on these materials. I have seen the draft benzene document and I will be attending a briefing by TCEQ on Thursday. The next Benzene Product Stewardship Coalition meeting is Monday and will report on findings and suggestions for commenting.

Hope all is well

Stuart

Stu,
Are you aware of this activity?? Is API working on this for benzene??

Thanks,
Jennifer Galvin

Is this exercise something in which we will be able to participate? I know our resources are strained in this area, but maybe on a couple of the high priority compounds we can take a look. I have heard the ESL for benzene is going up and the butadiene is going down, for example. I'm guessing we would support one and have concerns with the other.
