Subject: **PSM AWARENESS TRAINING**

Ask Dale Wilbanks to sign the sign in sheet.
Please give him the following information.

OSHA Regulation 1910.119 was established to aid in preventing or minimizing catastrophic events caused by the release of highly hazardous chemicals, explosives and blasting agents.

The regulation was passed May 26, 1992.
This regulation has 14 elements.

Condea Vista has three chemicals considered by OSHA to be hazardous.
Propane and VCM because they are a flammable gas exceeding 10,000 lbs.
Chlorine because it is listed on Appendix A with a threshold quantity of 1500 lbs.

Ask Dale to watch films.
Pass out the attached handout.
Give test.

Return test and handout sheet to me.

Thanks for your assistance. When Dale finishes this your department will be 100% trained in Process Safety Management Awareness Training.
