

LEAD INDUSTRIES ASSOCIATION

~~1000 LEXINGTON AVENUE~~ 18 East 42nd Street
NEW YORK 17, N. Y.

Pigments and Chemicals Division

February 25, 1958

SUBJECT: NOTICE OF MEETING

To Members of the Red Lead Technical Committee:

As previously announced, there will be a meeting of the Red Lead Technical Committee of the Lead Industries Association on Monday, March 3, 1958, at 9:30 A.M., in the offices of the Association.

A tentative agenda follows:

1. Approval of minutes of previous meeting of December 6, 1957.
2. Discussion of L.I.A. activities to date on the proposed revision to AWWA Specification D-102-55T.
3. Discussion of a proposal for a test project on red lead and various chromate mixtures.
4. Report of Chairman on S.J.P.C. meeting, February 11, 1958.
5. Report by Owen Shobe on his activities.
6. Report of experimental work performed by Hercules Powder Co. on Amine D derivatives as a rust inhibitor in primer paints.
7. Proposed Red Lead Technical Letters.
 - (a) Compilation of all previous Red Lead Technical Letters. (Members were to review Red Lead Technical Letters 6 through 12 for purposes of recommending what formulations to include.)
 - (b) Painting of rusted galvanized steel, new galvanized steel and aluminized steel with L.I.A. paint 361, Formula 9-1 to be recommended.
 - (c) L.I.A. Paint 329 performance as a ship bottom paint. No reference to U.S. Navy is to be made.
