Dallas, TX 75234

Dear Barb:

This letter is in response to your request for information on the presence of Proposition 65 chemicals in Vista's LPA Solvent. Based on data currently available LPA contains no detectable quantities of Proposition 65 chemicals.

For your information, this assessment is based on an analytical detection limit of .02 ppm for benzene and currently available polynuclear aromatic hydrocarbon analytical methods.

Sincerely,

Thomas G. Grumbles, C.I.H.  
Environmental Quality Manager
