[illegible] PATENT
February 13, 1945

Mr. [illegible] Ryan
Danville

HEAT CONTROL - [illegible] - Appr. 2548, 2551 & 2458

Your letter of 2/12 asks what the possibilities are of early completion of above projects.

Assuming OPA approval this week we will work about as follows:

Prior Jobs - The following jobs will come ahead of the subject projects:

Job	Mfg. Priority No.	Est. Completion
Heat Garage - B	Comfort Complaint	2 Weeks
Compound Room - B	#2	2 - 3 "
9 - 60° Cards - A	#3	4 - 6 "
Ceiling Condenser - A	#39	3 "

Since we will be waiting for materials about 4 weeks, the only interference from these sources would be on 9-60° Cards, which will not be serious.

Appr. #2551 - Mixing Tanks	#46	4 Weeks
Appr. 2546 - Blake Boxes	44A	8 "
Appr. 2458 - Sand Bins	49	12 "

The drawings are practically complete on all 3 jobs, so material can be ordered immediately upon receipt of OPA approval.
