From G. J. Stopps Location Haskell Laboratory No.
Subject Human Exposures to Asbestos Date Nov 12, 1964

This editorial in the British Medical Journal has just come to my attention. Much of the ground covered in this article is also covered in my recent trip report but two articles are new (that by Fowler et al. and that by W. Glyn Owen).

I have discovered that it will be relatively easy to obtain the names of the insulation workers at Chambers Works and I have asked for these to be sent to me. I shall then look at their health records.
