Subject: FEFANA position on the extension of the generic risk management approach - Viewpoint by the EU Association of Specialty Feed Ingredients
Attachments: 2022-10-21 Possible extension of GRA to feed_FEFANA position_final.pdf
Importance: High

Dear [REDACTED],

Since FEFANA represents business operators active on highly regulated products, and most additives added to animal feed are specialty chemical compounds, the industry is following carefully all developments linked to the chemicals strategy for sustainability towards a toxic-free environment.

FEFANA experts have been following with attention the different developments related to the revision of the REACH regulation and the actions proposed therein. Various feedbacks have been submitted in response to different relevant "Have your Say" initiatives.

With the attached position paper, we would like to draw your attention on the FEFANA perspective vis-à-vis the prospected extension of the generic risk management approach to further hazard classes and uses.

We kindly ask decision makers to duly consider our arguments in the ongoing debates around the revision of the REACH legislation.

Yours sincerely,

[REDACTED]
