

April 29, 1946

Dr. Willard Machle,
610 Park Avenue,
New York City 21.

Dear Bill:

We received an envelop from you today containing two glass slides on which there were blood films from J. A. Michlaski.

The two slides were very nearly shattered, and therefore I suggest the advisability of your having somewhat better equipment for sending them to us. However, we were able to find two pieces big enough for examination, and on these no stippled erythrocytes could be found.

Confirming our telephone conversation I anticipate being in Detroit and in attending Mc Cord's shindig. Barring accidents, therefore, I should have a chance to discuss a number of matters in whatever detail is necessary.

Sincerely yours,

Robert A. Kehoe, M. D.
