November 1, 1974

Mr. William B. Papageorge
Manager, Product Acceptability
Monsanto Industrial Chemicals Co.
800 N. Lindburgh Blvd.
St. Louis, Missouri 63166

Dear Bill:

Enclosed is a brief set of minutes of the meeting held in Boston on October 30. Accompanying these are two questionnaires... one on each individual discharge and a second summarizing all discharges for single facilities. I also enclose a proposed set of instructions to users on how to complete the questionnaires.

As soon as possible, I would appreciate comments from you on either the questionnaires or the instructions; we propose to send these in the mail on November 7. You will also note in the minutes that we feel we should cover the entire industry and have thought of five other companies that did not attend the meeting in Washington. This leads me to raise two questions to you...

1. is Monsanto willing to also sample and test for these five other companies?
2. have we omitted anyone who is a customer of yours that uses Aroclor 1016 or Aroclor 1242 in the manufacture of capacitors?

Best regards,

Clifford H. Tuttle
President

CHT/eb
Enclosures

P.S. Capacitor Specialties has already asked to be included; Wayne White is the contact man; phone number 714 743-9130. As this facility is so far away from the rest, I suggest

STLCOPCB4085274

you schedule it separately. Harold Dubilier of York would also like to be included; phone number 212 387 7110. I suggest we either reschedule everyone down one day the week of November 11 to let York be first or have your man wind up by doing York on November 15 after finishing in New Bedford.

Jessie Butner from Sangomo in Pickens, South Carolina wants to participate in the questionnaire. He feels sample taking is not necessary as they have just finished a go around under Monsanto's guidance. We are still trying to convince Westinghouse and High Energy to participate. The former suggests sample taking will not be required.
