CAREY ZETABESTOS - FDA

I have revieved the information you forwarded in conjunction with Carey Zetabestos.

I am somewhat reluctant to pursue this matter of FDA permission for use of up to 6% Zetabestos in food wrapping paper. The FDA is one of the most difficult and confusing government agencies from which to obtain information. At the moment we have so much adverse publicity in conjunction with the use of Asbestos, that I question whether we should "kick a sleeping dog" at this time.

If you consider this matter of the utmost importance, I will pursue it, otherwise I would recommend that we do nothing for the time being.
