PATRICK R. ATKINS

RE: CORPORATE INDUSTRIAL HYGIENE STAFF ASSIGNMENTS

Personnel changes and the welcome addition of Mr. Scott M. Anderson and Mr. Peter S. Bussey require some changes in the plant liaison assignments of the Pittsburgh Industrial Hygiene Staff. These changes were announced during the Industrial Hygiene Management Conference a few weeks ago. A new list of plant assignments is attached, with specialty assignments shown on the second page.

The Pittsburgh Staff Industrial Hygienists provide professional expertise and assist the plant personnel who have the responsibility for managing health hazards at each location. The list of plants assigned to each hygienist is designed to provide breadth of experience with the different types of operations involved in the Company and its subsidiaries. We have also placed increasing emphasis on geography in order to provide better control of travel expenses.
