M. S. Badollet

The Colonial Sugar Refining Co., Ltd.
Sydney, Australia - Blue Fibre

We are considerably interested in the sample of Australian Blue, Grade #3 which you furnished to us with copy of your letter to Mr. Cannon concerning this material.

You will recall that several years ago we secured a sufficiently large sample of an Australian Blue fibre, designated as "Rhys ATM Grade" to permit experimental operation on the pipe machine. This fibre was the best blue that we ever examined for Transite Pipe use. The current sample shows a considerable resemblance to the Rhys material. We shall be interested in receiving a lot of the fibre in sufficient quantity to permit experimental operation.
