DOCUMENT DESCRIPTION: Letter to Westinghouse Electric Corp. from
Asbestos Textile Institute

November 10, 1952

Mr. J. R. Welshons
Materials & Standards Engineering
Westinghouse Electric Corporation
East Pittsburgh, Pa.

Dear Mr. Welshons:

Enclosed herewith are my proposed changes for Westinghouse PDS 2060-M. I have endeavored to include herein all of the proposals discussed during our recent conference, however, there may be some provisions that do not meet with your approval. If so, please feel free to express your opinions.

You will note that I have not set forth the tensile strength values for 2060-2, 2060-3 and 2060-7. These have been left open because I have not had an opportunity to test enough such cloths to make authoritative recommendations. I will endeavor to procure such cloths from our members so that these figures may be obtained. I am sure I can make the necessary tests covering 2060-2, however, do not believe that anyone in our organization supplies the 10.4 and 7 ounce cloths called for in the last two classes and cannot, therefore, assure you of any results for these. If you would like to have me run such tests on cloths you might furnish, I will be glad to do so.

I wish to thank you and Mr. Atkinson for your considerations and cooperation in clarifying the subject specifications and assure you that the Institute will be glad to work with you at any time regarding problems involving asbestos textiles.

Very truly yours,
ASBESTOS TEXTILE INSTITUTE

Myril C. Shaw
