Look Ahead with Lead

January 20 1964

LEAD HYGIENE AND
SAFETY BULLETIN
NO. 133

To Members of the Lead Industries Association, Inc.:

"The 'USPES' Method for Determining Lead in Air
And in Biological Materials"

Under the above title Messrs. Keenan, Evans, Saltzman, and Nyslop of the U. S. Public Health Service have published in the American Industrial Hygiene Association Journal, Volume 24, September-October 1963, this outline of what has become a standard method for lead. This publication is timely since the old American Public Health Association handbook has been so long unrevised.

We have secured a limited number of copies which we can make available to you on request.
