DATE February 19, 1990
SUBJECT P-3097 EDC IPEL Job

This is to request information regarding the jobs in your area that have required respiratory protection to reduce EDC exposure. If you have any idea on how to reduce the EDC exposure levels in any particular job, please also include it with your response. Similar jobs in different plants may have the same remedy to reduce the EDC exposure and the cost effective way then can be selected. Some areas have already sent this information, however, I am also interested in having a copy of the results of the job testing for each individual area.
