FROM: N. D. KRIVANEK *NK*

The Fabrics & Finishes Department currently has nine active Information and Miscellaneous Services projects at Haskell (see attached list). These projects are designed to cover various small cost activities. In Haskell's agreement with Fabrics & Finishes Department on these projects a record of the specific activity, i.e., literature search on a particular chemical's toxicity or medical emergency, is required so that we can accurately account for dollars spent. This information is also used for preparing cost estimates for future work. If you charge time to one of these projects, note on your time sheet the specific item handled so that when we review with the department Haskell activities we can easily detail the work for each account.

If you have any questions on which MR time would be charged, contact E. E. Swain, Jr., 9-774-8186, or Neil Krivanek, X-5274.
