Subject

Dimta, S.A. Talc Samples

Seven samples of core have been selected from drill hole PF-3 being drilled at the Por Fin Mine in Spain. These samples are from 10m, 22m, 33.8m, 40.25m, 51.65m, 64.65m, and 20.45m.

Please test each sample for GEB, LOI, talc, chlorite, dolomite, magnesite, amphiboles, serpentine, total iron, fluorine and heavy metals (Hg, Zn, Pb, As, Cd, Cu, Ni, Au, & Ag).

Thank you for your help and please call if you have any questions.
