

1 there was a bronchoscopy done to see if Mr. Grewe had
2 a primary lung cancer, but it was no evidence of
3 bronchogenic cancer, and that was negative.

4 In November of 1992, again, he was
5 continuing to have shortness of breath and chest
6 pain.

7 You remember the one Dr. DeLuca, you
8 remember Mr. Grewe and the chest pain.

9 Shortness of breath and chest pain, pleural
10 biopsy, a large amount of fluid removed and that is
11 when they did the two pleurodeses.

12 They tried to scar and destroy and
13 obliterate the pleural space in his left lung so it
14 would eliminate a constant accumulation of that fluid
15 because that is the only way they could try to relieve
16 his shortness of breath.

17 It won't get rid of the pain, but it would
18 help to relieve the shortness of breath.

19 He was diagnosed with mesothelioma in
20 December of 1992. He was referred to the University
21 of Maryland Cancer Center for radical surgery, if
