Miami, Florida 33161

Dear Dick:

The week before last I met with both Stan Ponfa and Carl Setterberg. Several subjects were discussed, one of which is the dust problem on SprayDon "A". Stan reviewed his recommendations on the samples he sprayed, and advised he had forwarded them to you. We are evaluating an idea of our own but first await your conclusions on Stan's recommendations.

The importance of having a UL procedure for SprayDon "A" with oil was again discussed. We must have this authorized UL procedure in January, 1969.

Yours very truly,

UNITED STATES GIPSUM COMPANY
