Dear Brian

TOXICITY OF VC AND PVC ; A CRITICAL REVIEW - WAGONER

Thank you for sending me a copy of this paper by Wagoner. It is such a biased 'review' that it would take a paper of the same length to provide a just criticism. It surprises me that a reputable journal should find it acceptable. As you say, it will probably be widely quoted, but in the meantime I think we should do as little as possible to draw attention to it. Should the powers that be decree that we must write a rebuttal I will be happy to join forces with you, but it would be a major and unwelcome undertaking.

Yours sincerely

G M Paddle (Dr)
