

A LINER IS KNOWN BY

THE FUNNELS IT CARRIES

Quality lead pipe

is known by the marking it bears

NOW you can...

IDENTIFY NATIONAL LEAD PIPE

GONE are the days when lead pipe was just lead pipe. Today you can buy lead pipe that is quality-marked—stamped with the famous Dutch Boy trade-mark and the name of National Lead Company.

This branding is our way of making it easier for you to buy pipe of high, dependable quality, of correct wall thickness, of proper weight per foot.

Furthermore, when you install National Lead pipe, you and your customer are assured of the dependability that results

from high-quality lead-pipe installations.

Because of its flexibility, lead pipe is easy to store, handle and install. Few joints...bends and curves instead of elbows and tees...adaptability to varying conditions...these are some of the many reasons for using lead pipe. But of utmost importance is its corrosion resistance, particularly in soil lines. Lead pipe never rusts, and therefore never causes rust-clogged lines.

Give your customers National Lead pipe installations and benefit by the resulting satisfaction with the work you have done. Lead pipe means a quality job

LEAD PIPE

NATIONAL LEAD COMPANY
New York, Baltimore, Buffalo, Chicago, Cincinnati, Cleveland,
St. Louis, National-Boston Lead Co., Boston; Georgia Lead Co.,
Atlanta; Gilson & Price Co., Cleveland; National Lead & Oil Co.,
of Pennsylvania, Pittsburgh; John T. Lewis & Bros. Co., Philadelphia.

and every plumber knows there are bigger profits in that type of work.

The Dutch Boy trade-mark on solder is also a guarantee of uniformity and dependability. Since every bar, every ingot is marked to denote its composition, you can be sure of getting the same kind every time you buy. There's a grade of Dutch Boy Solder for every soldering purpose...including wiping.
