Subject: Watershed Deposition Results 

Rob,

Here are the deposition totals for the three different watersheds that we discussed. The Little Hocking and Lake Washington numbers are based on the area shown in the drawings that Andrew sent outlining the watershed. The Ohio River number is the total deposition within the area modeled, which is approximately 6.5 by 7.0 kilometers. This was the best I could do without doing another 15+ hour model run with a larger grid.

If you have any questions about what I did, please leave me a message and I will get back to you.

Debbie
