The continuation on that is that one must maintain that certification on a continuing basis. I believe it is every three years.

That certification is reevaluated and a letter with documentation is resubmitted along with a review of credentials and in some cases reevaluation of the testing.

Q Are you certified in toxicology?

A I am, sir.

Q Do you recall when you were first certified?

A During the first or second year when the certification was offered, I think it was 1981 that my certification came through.

Q Okay. If I understand your testimony correctly up to this point, pharmacology involves the study of chemicals that both aid and harm the body; is that correct?

A The full range of effects, that is correct.

Q As a pharmacologist and toxicologist, are you familiar with a concept that we have heard about
