Subject: Informational Materials for the China Benzene Consortium

To all,

The purpose of this e-mail is to inform you that Patrick Beatty, Lorraine Twerdok and I have been developing some informational material that should be useful in briefing your management on the China Benzene Research Project. These materials include the list below:

- * One-page flyer (actually two sides to be copied double-sided) giving a very basic description of the purpose and other particulars for the project, including a brief description of the costs and funding formula
- * Q&A packet to accompany the flyer that hopes to answer the more frequently asked questions we have been receiving
- * Short overview of the ethical issues and how they have been addressed
- * Technical Overview document that provides greater detail on how the studies will be conducted
- * Draft Consortium Structure document
- * Draft Contract

We hope to have at least the first three of these available for you by mid-week with the remaining documents to follow.

Regards,
George M. Woodall, Ph.D.
