DOCUMENT DESCRIPTION: Memo RE Talc - FDA Proposed Regulations

Johns-Manville

Internal Correspondence

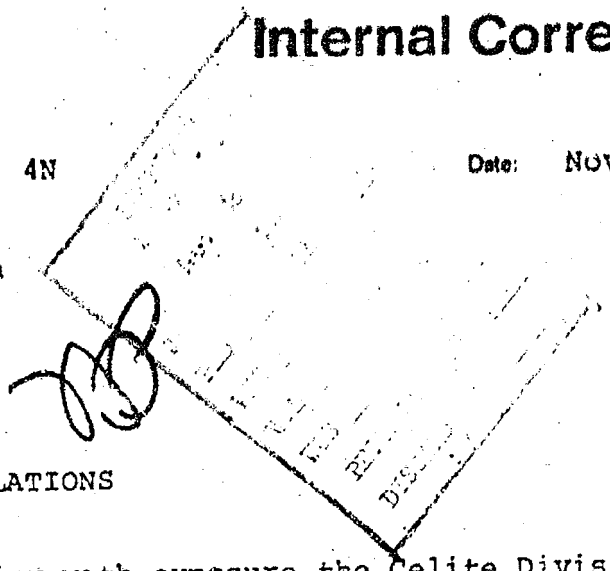

To: F.J. Solon - 4N

Date: November 28, 1973

From: P.A. Martinson

Copies:

Subject: TALC - FDA
PROPOSED REGULATIONS

You are familiar with exposure the Celite Division has with respect to processed Desertalc sales and marketing.

You are also aware that J-M must file, latest 12/27/73, depositions with respect to proposed regulations instigated by EDF.

These matters have a direct and serious impact on potential Division sales and growth. Accordingly, I would prevail upon you to do whatever possible to see that the depositions referred to are implemented and filed on schedule.

It is understood generally within J-M that the filing must be related mostly to medical considerations.

To coordinate total efforts it seems imperative that appropriate Corporate, Research and Division people meet as a body. I believe thatyou are in the best position to set meetings as necessary such that the right personnel are in attendance.

Be assure that the writer will be happy to assist in coordinating these efforts.
