Subject: Owens-Corning Fiberglas
San Francisco, California

On July 22nd we made a shipment of 100 bags of Cement. There were 78 bags packed in Fesco printed bags, and the remaining 22 bags were packed in OC-660 bags.

This closes out the last of the Fesco printed bags. This stock was originally purchased about eight years ago, the original purchase. We have known for several years that our guess on the amount of Fesco was in error (even though it was dictated by Mr. G.J. Christner himself). We have looked forward to the day this stock of bags to be used on West Coast shipments only would be depleted. That day finally came.
