

February 28, 1949

Mr. E. J. Dunn, Jr.,
National Lead Company Research Laboratories,
105 York Street,
Brooklyn 1, New York.

Dear Mr. Dunn:

It appears at the present time that March 4 would be a very good day for you to come to Cincinnati and to discuss the experimental work which you have in mind for us to do. I have a class from 8:30 to 9:30, but after that I shall be free to talk with you for as long as may be necessary.

In order that you may not have difficulty in reaching the Laboratory let me warn you to make no reference to the University of Cincinnati in your instructions to a taxicab driver, or you will find yourself on the main campus of the University. Instruct him to bring you to the College of Medicine, Eden Avenue, where you will find us easily.

Very truly yours,

Robert A. Kehoe, M. D.
