you would like to address before I move on to page 3?

A Well, there is a variety of them here that you can see.

There are some that go up a little higher than one fiber, but during that interval of time, that was an appropriate or considered an acceptable level.

That was done in 1970 by Hickish and Knight here and there are some other numbers, but I think the importance of these are to look through and see the numbers are really very low when you look at them in concert and look at the whole constellation.

Q I see that entry 12 is your study that we talked about earlier this morning?

A Oh, yes, there is my study.

Q You indicate it is unpublished.

Does it remain unpublished?

A It is still unpublished.

Q Why did you decide not to publish it?

A It served its purpose. It was there to demonstrate to the administration and the workers at that location that we did not have a hazard there and
