

"Look! ...they're Copperheads"

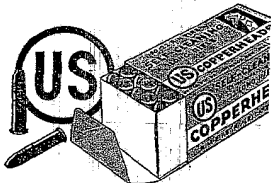

U. S. Copperheads, the .22's with coppered bullets and non-corrosive primers that prevent fouling and keep your rifle as clean as a whistle.

COPPERHEADS are accurate and hard-hitting...just the thing for target work or small-game shooting.

There's real pleasure in knowing that your ammunition is as good as you are...that the best eye and steadiest nerve will be matched by the quality of your cartridges. When you're hunting, it's a satisfaction to know that you will bring down...cleanly and surely...any small game you are after.

If you value good scores at the range or good bags in the field, it pays to make sure of getting Copperheads and getting them early.
