Four Thirty-Two West Forty-Fifth St.
New York 36, New York

Dear Mr. Pappas:

Aroclor 1242 was included in the first petition submitted by the Adhesives Manufacturers Association of America. However, the final section as issued on August 25, 1961 did not include this compound. We were told that the reason for this exclusion was that the Food and Drug Administration wanted a more definite description of the chlorine content. I will endeavor to find out what the present status of this product is.

Very truly yours,

R. Emmet Kelly, M. D.
Medical Director
