Mr. R. F. Johnson
Oil and Chemical Control
General Motors of Canada Ltd.
St. Catharines Plant
570 Glendale Avenue
St. Catharines, Ontario, CANADA

Dear Mr. Johnson:

I want to apologize for this very tardy reply to your letter of November 23 concerning our product, Pydraul F-9. As you know, Pydraul F-9 has recently been replaced by our product, Pydraul F-9A.

Neither Pydraul F-9 nor the new product, Pydraul F-9A, contains any metals of pollutional significance. These products are pure organics and our analysis shows no significant amounts of lead, mercury, cadmium or arsenic.

If we can be of any further help, please let us know.

Sincerely,

Jack T. Garrett
Manager, Pollution Abatement
