

January 30, 1943

Miss Margaret S. Perry,
The Journal of Industrial Hygiene and Toxicology,
55 Shattuck Street,
Boston, Massachusetts.

Dear Miss Perry:

No instructions were enclosed for the return of proofs of the Lead Symposium articles by Dr. W. C. Dreessen and Dr. Wm. F. Ashe, but inasmuch as you requested that the last group of proofs be returned to you, we are returning this group to you. Reprint order forms were also omitted, and we wish herewith to order 500 copies without covers of the article #2345, Industrial Lead Poisoning as a Clinical Syndrome by Wm. F. Ashe, unless the entire symposium is reprinted in one binding, in which case we shall want 500 copies of the entire symposium instead. Dr. Dreessen advised us some time ago that he would like 500 copies or more depending on the cost. Inasmuch as we do not know the exact number of pages nor the cost per page, we suggest that you advise him directly and secure his order.

Cordially yours,

Robert A. Kehoe, M. D.
