FEEDSTUFFS, Sept. 25, 1971

PCBs, Selenium On Agenda for ANRC Meeting

BELTSVILLE, MD. — Details of the 1971 meeting of the Animal Nutrition Research Council have been announced. The meeting will take place at the Marriott Twin Bridges Motor Hotel on Oct. 14.

Among the speakers on the morning program are: W. L. Marusich, Hoffmann La-Roche Inc., current states of vitamin D3 reference standard; K. W. Keane, Champion Valley Farms, Inc., automated procedures for the measurement of protein efficiency ratio; D. T. Hopkins, Ralston Purina Co., problems associated with the determination of protein efficiency ratio by standardized procedures; H. Fisher, Rutgers University, considerations for the carcass retention procedure of protein evaluation in the chick; G. Ramsey, Agway, Inc., the effect of feeding poly-chlorinated biphenyls (PCBs) to poultry; L. M. Potter, VPI, the precision of measuring metabolizable energy in poultry, and R. E. Hatfield, University of Illinois, protein and amino acid nutrition of ruminants.

The luncheon speaker will be R. P. Lehman, Bureau of Veterinary Medicine, Food & Drug Administration, who will discuss the FDA review program of proposed new feed additives.

Afternoon speakers will be C. H. Hill, North Carolina State University, the fate of toxic metals ingested by poultry and other livestock; W. G. Pond, Cornell University, swine nutrition research, and D. E. Ullrey, Michigan State University, selenium in swine nutrition.
