

# How Tight? Drop Tight!

## This True Ball Joint Makes the Difference

Spherically ground Dart seats say "no" to leaks as long as in service — and as often as piping is changed. Darts can be taken off the line and used elsewhere time and time again. That's economy! What's more, the tight seal comes easily without heavy wrenching or strain.

### QUICK FACTS

- Two bronze seats provide top resistance to pitting and corrosion
- Heavy shoulders can withstand the strongest yanks of the wrench
- Nut and body of air-refined, high test malleable iron are practically indestructible
- Threads are full and clean-cut of hard metal to prevent stripping

Experience proves that the men who buy Darts, the men who use Darts and the men who sell Darts have "something special"!

## More EQUIPMENT NEWS

indication or recording to any part of the plant. Distances up to 1000 ft are practical. Unit is suitable for panel, pedestal or wall mounting and is available in either 6 or 8 1/2 in. size gages. Bulletin 780.  
Penn Industrial Instrument Corp., 4110 Haverford Ave., Philadelphia 4, Pa.

### Power Supplies

624 • New line of metallic rectifier power supplies for electroplating and anodizing operations is announced. Line includes manually controlled and automatically regulated units, as well as special equipment for barrel plating and precision laboratory work.

Do ratings range from 500 amps at 6 to 2000 amps at 48 v for manually and automatically regulated systems. Single control station controls entire output of the system regardless of the number of individual units. Manually controlled systems can be converted to automatic regulation. General Electric Co., Schenectady 5, N.Y.

## THE ANCHOR PACKING COMPANY OFFERS PLASTIC PACKINGS FOR MANY USES!

### CARBONITE...COIL

INDUSTRY finds many uses for Style 808-C Cotton plastic Anchor packing, including centrifugal pumps, shafts, high or low speed; rotary rods or shafts; reciprocating rods and plungers; expansion joints; valves, stems, and other applications against air, oil or water. It is unique in that it contains no wax or tar.

### CARBONITE 808W (Ring and Spiral)

IN FOOD PROCESSING APPARATUS, there is no other packing than this Anchor product. Style 808-W is a white mixture in which powdered mica has been added for flake graphite, making it suitable where graphite might be objectionable.

Style 808W-M.J. (No Jacket) Ring, Spiral, is another Anchor packing in which Anchor uses pure asbestos and mica lubrication for food handling devices where graphite is not desired.

### CARBONITE ANGULAR MOLDED RING

Style 808-Q is extensively used where conditions are as high as 1650 pounds of steam and temperature as high as 950° F. Meets exacting needs of control valves, expansion joints, header valves and high temperature, high pressure packing elements.
