Copies : Joe Chen, files

Subject : PURCHASE SPECIFICATION "DRAFT" FOR WHITE GRADE 4 ASBESTOS FIBER

Attached is a "draft" of a purchase specification intended to cover Grade 4 Fiber for use in AC Pipe.

Please critique Section II Detailed Requirements of this specification for its ability to provide an acceptance standard for purchasing of this grade fiber.

A final "draft" will be prepared from the information you provide in response to this correspondence.

Please review also, any currently approved suppliers of Grade 4 Fiber and provide vendor data so that they can be incorporated into this specification.

There is also a need for a Grade 5 Fiber Specification, following the same format as this one.

Please advise Headquarters of your comments on the detailed requirements and current approved suppliers for this type and grade fiber.

In order to prevent any unnecessary delays in issuance of a final specification, please respond by October 31, 1985.
