SHERWIN-WILLIAMS INSECTICIDES AND FUNGICIDES

We have long been known to Agriculturists and Horticulturists as manufacturers of the best quality of Paris Green on the market—our goods are recognized as standard everywhere.

Some years ago we recognized the growing importance of completing our line by adding such goods as Arsenate of Lead, Lime-Sulfur Solution, etc., with the result that today we are able to offer a complete line of insecticides and fungicides.

A description of our Paris Green, New Process Arsenate of Lead, Lime-Sulfur Solution, etc., will be found below. Each and every one of our insecticides conforms in every way not only as to quality, but also as to labeling, etc., to the requirements of the National Insecticide Law.

DRY POWDERED ARSENATE OF LEAD

The Sherwin-Williams Dry Powdered Arsenate of Lead has many advantages over both dry and paste Arsenates of Lead now to be found on the market. A complete description of this product together with an outline of its advantages will be found on page 92.

NEW PROCESS ARSENATE OF LEAD (PASTE)

(Containing Adhesive Lead Compounds)

This product will be manufactured and marketed on the same basis as heretofore, with the exception that in the future it will be known by the above name. There is absolutely no change in formula or in composition from previous years, and its use will insure the same good results. It is absolutely safe, reliable and effective for both fruit-tree and truck-crop spraying, and particularly so when used in the so-called combination spray. The phrase: "Containing Adhesive Lead Compounds" has been added, simply to comply with the technical requirements of the U. S. Insecticide Law.

15 PER CENT ARSENATE OF LEAD (PASTE)

Where there is a definite demand for an Arsenate of Lead containing from 15 to 16 per cent of arsenic oxide, S-W 15 per cent Arsenate of Lead should be sold. It is absolutely safe for use on fruit foliage, and is far superior to the Acid Arsenates of Lead of our competitors in suspension properties, adhesiveness and general all 'round good qualities. It is particularly recommended for shade-tree work. Our 15 per cent Arsenate of Lead will be put up in steel packages this year.

PARIS GREEN (DRY)

S-W Paris Green is recognized by the trade as an old reliable, effective brand, that has proven its efficiency. Because of its extremely fluffy nature, this green remains thoroughly in suspension, and sprays a larger area per pound than any other brand. Its fineness insures more uniform distribution of the poison on the foliage, and consequently it gives better protection. Put up in attractive sift-proof cartons and steel packages, all labeled to comply with the legal requirements of the Government and all states.
