Eden Avenue
Cincinnati 19, Ohio

Dear Bob:

As you yourself must have been aware, a major defect of the A.P.H.A. booklet "Occupational Lead Exposure and Lead Poisoning" is the lack of any adequate index. This led me, several years ago, to have a subject index made up for my own use, and now, with the thought that they may be in some way useful to you in the revision for which you have assumed responsibility, I have had some copies run off and am enclosing two of them herewith.

I hope you will see to it that there is a really good index to the revised edition.

Even more too I hope that you will find the time to give me some answer to my letters of May 13th and June 24th on the subject of this revision. It would mean a good deal to me to have at least your best guess as to when the work on the revision will be completed.

Sincerely,

MB:G
