

1 MR. FRIESTEDT: Objection to form.

2 A (Complies.) Yes, I see that, I understand.

3 Q This indicates that at least by 1972 FMSI members  
4 knew that subsequent operations to brake linings and clutch  
5 facings such as cutting, grooving, drilling or grinding could  
6 produce airborne concentrations of asbestos in excess of  
7 current exposure limits of five fibers per CC; correct?

8 MR. FRIESTEDT: Objection to form.

9 A This means that the delegates and alternates,  
10 which are the members and the Asbestos Study Committee were  
11 aware of this here, yes.

12 Q Were you ever involved in any effort to  
13 disseminate this information to the general public?

14 A I don't think I disseminated that as such. We  
15 were trying to tell the members about this particular  
16 problem. We were trying to get people to educate the user  
17 properly and this was just something to let them know that  
18 there was -- there was a requirement to go and do some  
19 labeling if you had this kind of a problem.

20 Q When you say you were trying to get people to  
21 educate the public?

22 A Not -- I said the public. I am talking the --  
23 the -- the -- educate the members who in turn would educate
