RE: Unibestos Insulation

Attention: Mr. George Wilkening

Gentlemen:

Following is the composition of Unibestos Pipe Insulation:

Amosite Asbestos - 63 to 70%
Sodium Silicate - 20 to 22%
Diatomaceous Earth - 10%

In addition the following chemical analysis of Amosite Asbestos is also submitted:

<u>AMOSITE</u>		<u>CHEMICAL ANALYSIS</u>
Silica	SiO ₂	50.24
Alumina	Al ₂ O ₃	
Ferric Oxide	Fe ₂ O ₃	7.30
Ferrous Oxide	FeO	32.00
Magnesia	MgO	3.96
Lime	CaO	
Sodium Oxide	Na ₂ O	2.12
Combined Water	H ₂ O	3.00

Confirming our conversation of yesterday I have investigated, with various people in our organization, the experience of handling Unibestos. As near as can be determined we have never had any complaint from the field that would indicate Unibestos causes itching or irritation of the skin.

I sincerely hope the above information meets your requirements and that we can be of further service to you in this matter.

Yours very truly,
UNION ASBESTOS & RUBBER COMPANY
