Chicago

Dr. C.-E. A. Winslow

Dr. Leonard Greenburg

March
19
1932

Gentlemen:

As I have acknowledged the hundreds of telegrams and letters addressed to Mr. Bergquist on the sand blasting study I have come across the attached from Mr. R. A. Bull, the Director of the Electric Steel Founders Research Group, Chicago, which I thought would be of some interest to you.

Mr. Bull attended the Conference in Chicago, March 8. He and I were employed by the American Steel Foundries in New York in 1905, and he later became associated with our past President, Mr. Arthur T. Morey, in the Commonwealth Steel Company, Granite City, Illinois, where he remained until 1920, and since that time has been the leader in the Electric Steel Founders Research Group.

Please return this letter at your convenience.

Sincerely yours,

W. H. Cameron
Managing Director
