

INTRACOMPANY CORRESPONDENCE

R-98 (Rev. 1-68)

FROM:	A. S. Millsap - Safety Director Sherwin Plant	
TO:	Ronald E. Benton - Industrial Hygiene G08	
COPY:	D. V. Hopkins/Roger Nelson, Bill Warner	
DATE & SUBJECT:	July 18, 1985	RESPIRATORY PROTECTION

In response to your June 3, 1985 letter requesting information on respirator usage in the Sherwin Plant, I submit the following:

<u>TYPE RESPIRATOR</u>	<u>NUMBER USED IN 1984</u>
3 M 9920	4233
MSA DUST FOE 66	45
MSA DUST FOE FILTER P/N 461-683	55
WILSON 1600 FULL FACEPIECE	4
SCOTT AIR PACK	4

For your information, the Scott Air Packs are only for use by emergency crews when necessary. The Wilson 1600's are used only in special cases where necessary on special welding jobs. The MSA Dust Foe is normally used by the painters and the 9920 is the normal respirator for general use in the plant.
