SUBJECT: Non-asbestos Gasket Materials

Ken Cleveland informed me today, May 9, 1988, that he would no longer purchase asbestos material. He estimates that he has 3 months of all sizes on hand, and longer on certain sizes. We have a short time to approve for production a material containing NO asbestos.

We need to move now in order to be able to build product in 3 months. August is a short time away. Some sizes may be needed earlier than anticipated, especially sizes .025 - .028 for Hartselle.
