Vandiver Brown

Asbestos Studies - Saranac

These books had not yet arrived when I left, but I am giving you a copy of Mr. T. M. Durkan's letter to me of October 12, and Miss Hobart will check with you as to what disposition we should make of the books at this time. I know you want to do nothing with them until after you have had a chance to study them.

Asbestos has been quite anxious to know the results of the study, and no doubt Ivan Sabourin is likewise interested. However, I am asking Miss Hobart to check with you first before sending any books out to anybody.

J. F. Woodard
