June 25, 1971

Mr. Robert G. Keenan
25711 Southfield
Southfield, Michigan 48075

Dear Bob:

Confirming our telephone conversation, our [redacted] is a heat transfer grade of 42% chlorinated biphenyl. Its toxilogical properties then relate to our trademark product known as Aroclor 1242.

I have enclosed a copy of Joe Treon's publication relating to the inhalation toxicity of this material as well as a copy of the AIHA Hygienic Guide.

There is also enclosed a copy of our technical data sheet for our Aroclor line of products.

Best personal regards,

Sincerely,

Elmer P. Wheeler
