Mr. B. Coppens
Purchasing Manager
Kelsey-Hayes Company
512 N. Wisner
Jackson, Michigan 49202

Dear Mr. Coppens:

The Toxic Substance Act which is enforced by OSHA is continuing to have an increasing effect on a number of the raw materials used in some of our brake lining formulations. As a result, we find there are some formulas which must be removed from production if we are to meet these more stringent requirements.

The part numbers and remarks are as follows:

<u>Part Number</u>	<u>Formula</u>	<u>Remarks</u>
22474	64-B	We suggest the use of our formulas 693-551-C or 693-551-D.

In the event we may have missed any part number that specifies the above mentioned formula, please place this part number in the same category as mentioned above.

Thank you for your usual 100% cooperation.

Yours very truly,

A. F. Schmaltz
Sales Administrator
