Dr. W. E. McCormick, Director
Department of Industrial Hygiene
and Toxicology
The B. F. Goodrich Company
Akron, Ohio

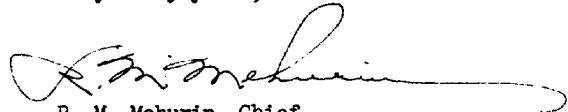

640r

Dear Dr. McCormick:

This is in reply to your letter of April 25, informing us of the composition of Geon 81700 which is proposed for the fabrication of plastic pipe in which curing pickle and similar liquids will be conveyed.

Plastic pipe composed only of a material of the composition stated is acceptable to this office for conveying curing pickle and similar liquids in establishments operating under Federal meat inspection.

Very truly yours,

R. M. Mehurin, Chief
Chemical Control Section
