Plea Made for Ne Growing Number

Lawrence J. Linck, newly elected executive director of the National Society for Crippled Children and Adults, yesterday told an annual meeting of the California chapter that a "right place must be made in this changing world for the growing numbers of handicapped peoples."
 Speaking at the Hotel St. Francis he said that both collectively and individually the Nation has been given a tremendous opportunity to bring about those changes which will afford the handicapped a better position in society.
 Linck emphasized that the handicapped are a "part of society and not apart of it." He said their needs are the "same as the needs of all peoples."
