General Sales Bulletin #119-62

SUBJECT: LITE ACOUSTICAL PLASTER

CC:
Mr. Malcolm Meyer - President

RE: Discontinuance of Product

Mr. K. A. McCaskill - General Sales Mgr. BY: C. E. Abbey - sad

Due to the continued poor sales of Bestwall Lite Acoustical Plaster, it has been decided to discontinue the sale of this material. It will not be shown in Bestwall Literature after January 1, 1963. Raw materials left will be consolidated at those plants where there are job commitments that need to be met.

Please discontinue soliciting new orders for this material immediately. Where a contractor or architect sees the material advertised, as in Sweets Catalog of 1962 or some other Bestwall literature, orders may be accepted for shipment on or before December 31, 1962. Where a firm order is offered for shipment in 1963, advise General Sales through your District Office so that a determination may be made as to what plant can ship the material if the order is accepted.

Will each District Office prepare a list of jobs calling for delivery later in 1962 and send to Ardmore for the writer's attention by December 1, 1962.

In the event you have a large order in hand or pending, please advise immediately.

RE: Discontinuance of Product

BY: V. J. Lipnicki - rja

This is a supplement to Bulletin #119-62 under same subject in order that you and our customers completely understand our reasons for dropping Lite Acoustical Plaster from our lines.

Our judgment is based on the following adverse factors that have become acute with "clay base type of acoustical plasters" and are an industry problem.

1. Difficulty in controlling bloody rust spots and fungus growth on jobs.
2. It is almost impossible to refinish or to clean after (5 to 6 years) without losing acoustical value, bleeding of impurities or damaging soft surface.
3. Increasing acceptance of other types of acoustical plasters.

Although we consider the quality of Bestwall Lite Acoustic Plaster better or equal to similar competitive materials (Audicote Sprayolite) we do not feel that this type of product measures up to the needs of the building industry and to the standard of our other products. We are, however, continuing to explore the possibility of having a different type of acoustical plaster product as part of Bestwalls full line of Lath and Plaster Products.

General Sales Bulletin No. 5-63

SUBJECT: LITE ACOUSTIC PLASTER

CC:
Mr. Malcolm Meyer - President
Mr. K. A. McCaskill - Vice President

RE: Discontinuance of Product

BY: C. E. Abbey - mm

As anticipated by General Sales Bulletin No. 119-62, dated October 15, 1962, the Bestwall Gypsum Company discontinued Lite Acoustic Plaster as of January 1, 1963. Provisions were made to provide for a few jobs that were brought to our attention.

The remaining stock of raw materials available at the various gypsum plants are being assembled at Acme, Texas, in accordance with the instructions of the Manufacturing Department. For the information of various salesmen who get plaster material out of the Acme Plant, orders for Lite Acoustic Plaster, both White and Ultra White, for shipments directly from the Acme Plant will be accepted. The characteristics of the material, the selling price--f.o.b. the plant, the literature currently available will be applicable.

Please note that Lite Acoustic is not mentioned in the 1963 Sweets' Catalog for Bestwall. New literature will not be made for the material.

Dallas, Houston, Kansas City and New Orleans Sales Districts please note the continued availability of this product out of Acme will depend entirely on the movement. Be sure the salesmen involved with the three accounts (Baton Rouge, Little Rock and Memphis) keep the plant aware of any large job prospects.

Lite Acoustic plaster is presently available only at Acme, Texas. The only exception to this is any commitment made for a particular job prior to the time the formula were cancelled. No orders, excluding the above exception, are to be accepted by any plant other than Acme. If this presents a problem for any salesman, they should be advised to take the matter up with General Sales through their district sales office.
