Note 14. Estimated Income Taxes (Continued)

Worldwide, we have operating loss carryforwards of approximately \$687 with remaining lives ranging from one year to an indefinite period. Valuation allowances are provided for deferred benefits if the realization of the benefits is uncertain. To reflect uncertainties related to utilization of specific loss carryforwards, we increased the valuation allowance by \$19 in 2000 and \$26 in 2001. Net benefits recognized for loss carryforwards generally relate to the U.S., where we have traditionally been a taxpayer, and Brazil and the United Kingdom, where operating losses may be carried forward indefinitely. Foreign tax credits may be used to offset the U.S. income taxes due on income earned from foreign sources; however, the credit is limited to the total U.S. taxes payable on income from all sources. Excess foreign tax credits may be carried back two years and forward five years. As of December 31, 2000 and 2001, we believe it is more likely than not that we will generate a sufficient level and proper mix of taxable income within the appropriate period to utilize all the foreign tax credits. If we are unable to generate a sufficient level and proper mix of taxable income within the appropriate periods we may be unable to utilize some or all of these tax benefits. The foreign tax credit carryforwards expire as follows: 2003, \$5; 2004, \$20; 2005, \$28; 2006, \$26.

Cumulative undistributed earnings of non-U.S. subsidiaries for which U.S. income taxes, exclusive of foreign tax credits, have not been provided approximated \$852 at December 31, 2001. U.S. income taxes have not been provided on these undistributed earnings since we intend to permanently reinvest them. If the total undistributed earnings of non-U.S. subsidiaries had been remitted in 2001, a significant amount of the additional tax provision would have been offset by foreign tax credits.

We paid income taxes of \$136 in 1999 and \$98 in 2000 and received a net refund of \$38 in 2001.

The effective income tax rate differs from the U.S. federal income tax rate for the following reasons:

	Year Ended December 31		
	1999	2000	2001
U.S. federal income tax rate	35.0%	35.0%	35.0%
Increases (reductions) resulting from:
