Dr. Paul Parrot, Demographer
Ministry of Health and Social Welfare
Parliament Buildings
Quebec, Que., Canada

Dear Dr. Parrots

Thank you for the mortality data on tuberculosis which you have so kindly had tabulated for us and which has just been received. We will undertake to construct rates on the basis of this data and shall be glad to send you copies of this as soon as they are available. One other item I had thought you were going to include which I do not find in the data you sent, namely, infant mortality. I wonder if this was overlooked or if you found that this could not be done.

We do appreciate your help in giving us this information, and I am sure it will assist us in studying and rendering what aid we can in the control of the tuberculosis problem. With kindest regards.

Sincerely yours,

Assistant Medical Director
